

WebSphere for DBAs

Mike Chaney ChainLink Networking Solutions, Inc. mikec@chainlink.com

Purpose

- How does WebSphere work
 To explore different ways to utilize WebSphere to make the DBA job easier
- Demonstrate via simple examples how to utilize WebSphere with IDS

Development Environment

- WebSphere Studio v5.1
 - Site Developer
 - Application Developer for J2EE
- Informix IDS v9.3
- WebSphere Application Server (optional)

WebSphere Overview

What is WebSphere?

WebSphere Portal Server

WebSphere Everyplace

WebSphere Commerce

WebSphere Business Integration

WebSphere MQ Integrator Broker

WebSphere MQ

WebSphere Application Server WebSphere Studio

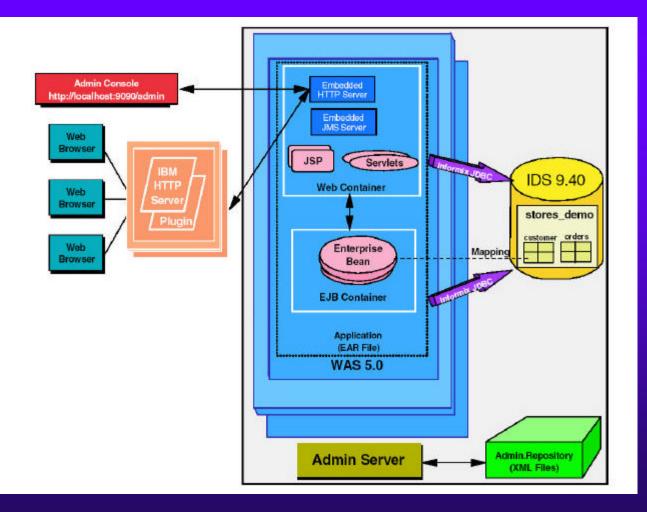

WebSphere Studio

- Core Open Source Eclipse project
 - Developer community for plug ins
- Includes WebSphere Application Server
- Can be used with other J2EE servers (i.e. Apache Tomcat)
- Role based perspectives
 - Data perspective
 - Java Perspective
 - Web Perspective
 - J2EE Perspective
 - Server Perspective

Integrating IDS with WebSphere

Setup Server Environment

- JDBC Driver
- Informix Environment Variables
- JNDI Datasource

Install Informix JDBC Driver

Download the JDBC driver alone from: <u>http://www-3.ibm.com/software/data/informix/</u>
